

Schoology to Google Forms

Quiz Converter: Teacher Guide

Step-by-step instructions for moving your quizzes out of Schoology and into Google Classroom

Email	maryganey188@gmail.com or marganey@iu.edu (I respond faster to the .edu email)

Overview

This guide walks you through using a free tool that converts your Schoology quizzes into Google Forms quizzes. This product handles the movement of quiz materials, if you need to move other types of materials to google drive please contact me! I am more than happy to alter the tool to accommodate the request or build another tool.

Here is what the tool does:

- Reads your quiz from Schoology (as a downloaded .imscc file)
- Extracts all questions, answer choices, and correct answers
- Creates a Google Form quiz automatically in your Google Drive

The tool runs inside Google Colab, a free, browser-based tool from Google. You do not need to install anything on your computer.

TIP

You will need a Google account (your school Google account should work perfectly). Everything runs in your browser, no installation should be needed.

What You Need Before Starting

Before following the steps below, make sure you have:

- A Google account (your school Gmail works)
- Access to Schoology to download your quiz file
- A web browser (Chrome is recommended)

Everything else is provided.

Part 1: Download Your Quiz from Schoology

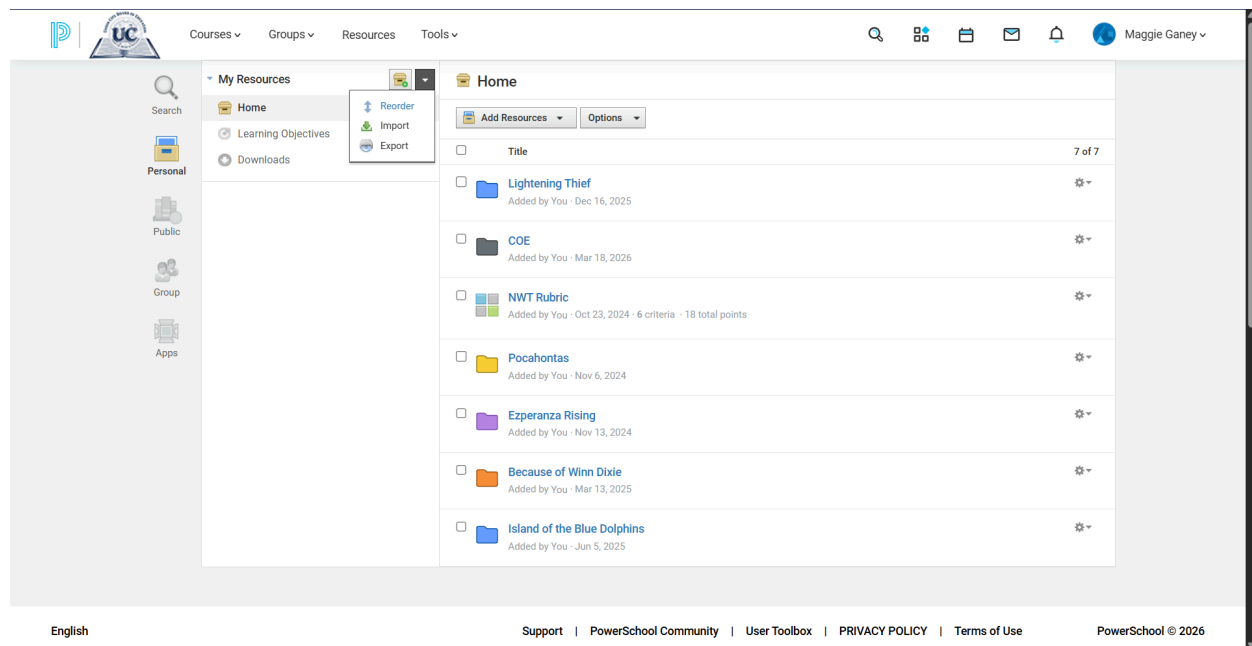

You need to export your quiz from Schoology as an .imsc file. Follow these steps:

Step 1: Open your course in Schoology

1. Log in to Schoology and open the course that contains the quiz you want to move.

Step 2: Go to Resources tab (at the top of the page)

1. Click on the drop down arrow near the left sidebar next to My Resources.

Step 3: Export the quiz

1. Select Export from the dropdown menu.
2. Hit export on the popup.
3. Click on the blue "Transfer History" at the top of the page.

4. After navigating to Transfer History, click the settings gear next to the file and click “download”
5. A file ending in .imscc will download to your computer.

The screenshot shows the Schoology interface with a user named Maggie Ganey. The 'My Resources' sidebar is on the left, and the 'Home' section is active. A dialog box titled 'Export Collection' is open, showing the following details:

- Export as:** Common Cartridge (IMSCC)
Note: Media Albums and SCORM files will not be included in the export
- Collection:** Home
- Folder:** COE

The dialog box has 'Export' and 'Cancel' buttons. Below the dialog box, a list of resources is visible:

- Pocahontas (Added by You - Nov 6, 2024)
- Ezperanza Rising (Added by You - Nov 13, 2024)
- Because of Winn Dixie (Added by You - Mar 13, 2025)
- Island of the Blue Dolphins (Added by You - Jun 5, 2025)

The interface is powered by Schoology.

The screenshot shows the Schoology interface with a user named Maggie Ganey. A green banner at the top states: "Your export file is currently being generated. You can access a list of your transferred files from your [Transfer History](#) area". The 'My Resources' sidebar is on the left, and the 'Home' section is active. A list of resources is visible:

- Title (7 of 7)
- Lightening Thief (Added by You - Dec 16, 2025)
- COE (Added by You - Mar 18, 2026)
- NWT Rubric (Added by You - Oct 23, 2024 - 6 criteria - 18 total points)
- Pocahontas (Added by You - Nov 6, 2024)
- Ezperanza Rising (Added by You - Nov 13, 2024)
- Because of Winn Dixie (Added by You - Mar 13, 2025)
- Island of the Blue Dolphins (Added by You - Jun 5, 2025)

TIP

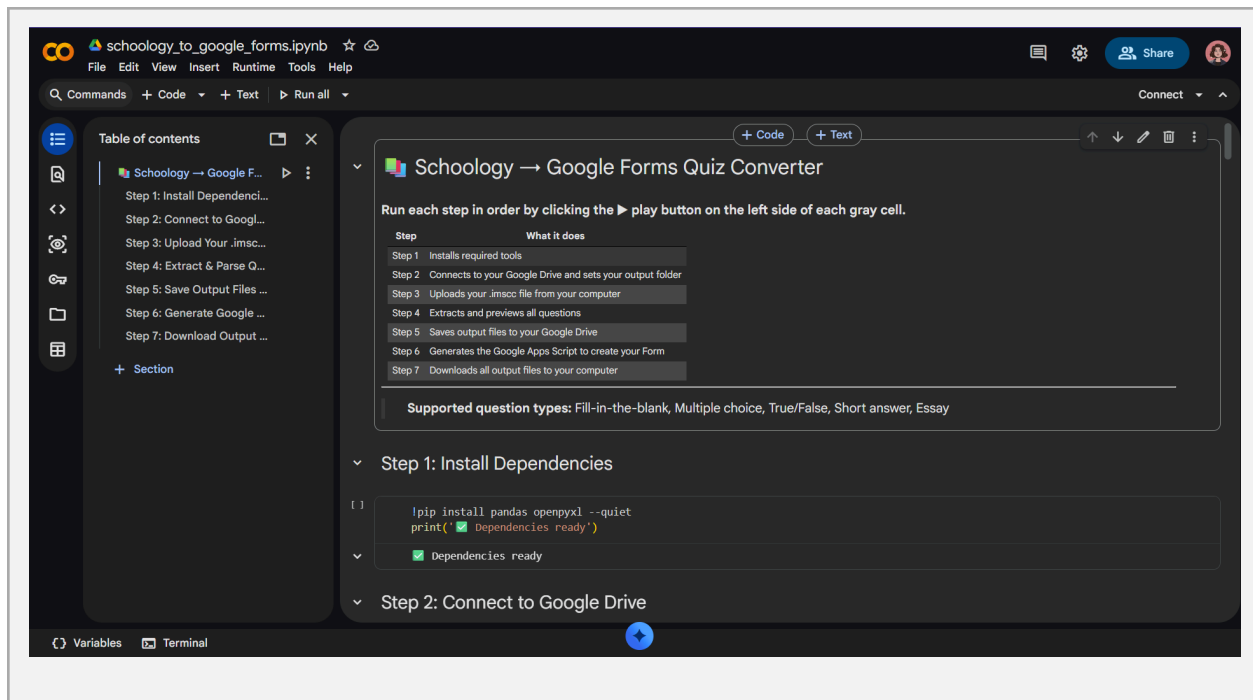

The downloaded file will have a name like folder_name.imsc and will likely appear in your Downloads folder. Leave it there for now, you will upload it in Part 3.

Part 2: Make Your Own Copy of the Converter Tool

The converter tool is saved in Google Colab. You need to make a personal copy so that you can run it and save your quiz files to your own Google Drive.

Step 1: Open the shared Colab link

- Here is the Google Colab notebook: [Copy of schoology_to_google_forms.ipynb](#)
- Click the link, it will open in your browser.
- You will see a page that looks like a document with code blocks in it. This is normal!

Step 2: Make your own copy

2. At the top of the page, click the File menu.
3. Select Save a copy in Drive. (Your drop down might look different than mine because of permission settings, this is fine, click “Save a copy in Drive” anyways).
4. A new tab will open with your personal copy of the tool.
5. The file will be saved to your Google Drive under a folder called Colab Notebooks.

The top part of the image shows a Jupyter Notebook titled 'schoolology_to_google_forms.ipynb'. The notebook contains a script for converting Schoolology quizzes to Google Forms. The script is divided into two main sections: 'Step 1: Install Dependencies' and 'Step 2: Connect to Google Drive'. The first section shows the installation of 'pandas' and 'openpyxl' using 'pip install'. The second section shows the connection to Google Drive using 'gdrive'. The notebook also includes a 'File' menu with options like 'Locate in Drive', 'Open in playground mode', 'New notebook in Drive', 'Open notebook', 'Upload notebook', 'Rename', 'Move', 'Move to trash', 'Save a copy in Drive', 'Save a copy as a GitHub Gist', 'Save a copy in GitHub', 'Save', 'Save and pin revision', 'Revision history', 'Notebook info', 'Download', and 'Print'.

The bottom part of the image shows a Google Drive interface. The 'My Drive' section is highlighted, and a list of files and folders is displayed. The files include 'Colab Notebooks', 'REU2025', 'c201 dictations', '2/16/25 c565', '3 Minute Thesis Practice #1', '4.1, 4.2 Quiz Review', '343Lab', 'A100 HW2', and 'A100 HW3'. The 'Colab Notebooks' folder is circled in red.

TIP

IMPORTANT: Always use your personal copy from now on, not the original shared link. Your copy is the one that will save files to your Google Drive.

Step 3: Set where your output files will be saved (optional)

1. Near the top of the notebook you will see a gray code cell.
2. Look for the line that says: `OUTPUT_DIR = '/content/drive/MyDrive/quiz_outputs'`
3. You can change `quiz_outputs` to any folder name you prefer.
4. For example: `OUTPUT_DIR = '/content/drive/MyDrive/Schoolology Imports'`
5. If you do not change it, your files will go to a folder named `quiz_outputs` in the main section of your Google Drive.

```
from google.colab import drive
import os

# CHANGE THIS LINE to set where your output files will be saved in Google Drive
OUTPUT_DIR = '/content/drive/MyDrive/quiz_outputs'

print('📁 Connecting to Google Drive...')
print('📄 A pop-up will ask you to sign in and grant permission - click Allow.')
drive.mount('/content/drive')

os.makedirs(OUTPUT_DIR, exist_ok=True)
print(f'✅ Google Drive connected!')
print(f'✅ Output folder ready: {OUTPUT_DIR}')

...
Connecting to Google Drive...
A pop-up will ask you to sign in and grant permission - click Allow.
Mounted at /content/drive
✅ Google Drive connected!
✅ Output folder ready: /content/drive/MyDrive/quiz_outputs
```

✓ NOTE

You only need to set the output folder once. It will remember your choice the next time you use your copy of the notebook. Alternatively, if you would like to save your files to different locations based on the quizzes, feel free to change the directory anytime!

Part 3: Convert Your Quiz

Now you will run the tool to convert your Schoolology quiz. Follow these steps in order, you must run each step from top to bottom.

Step 1: Connect to Google Drive

1. Scroll to the top of your copy of the notebook.
2. Find the cell labeled Step 1: Connect to Google Drive.
3. Click the play button (▶) on the left side of the cell.
4. A pop-up will ask you to sign in or grant permission. Click Allow.

5. Wait until you see a green checkmark or the message: Drive mounted successfully.

The screenshot shows a Jupyter Notebook titled 'schoolology_to_google_forms.ipynb'. The interface includes a top menu bar with 'File', 'Edit', 'View', 'Insert', 'Runtime', 'Tools', and 'Help'. Below the menu is a toolbar with 'Commands', 'Code', 'Text', and 'Run all' buttons. On the left, a 'Table of contents' sidebar lists steps from 'Step 1: Install Dependencies...' to 'Step 7: Download Output ...'. The main notebook area displays two code cells. The first cell, labeled '[4]', contains the command `!pip install pandas openpyxl --quiet` followed by `print('Dependencies ready')`, with a green checkmark indicating successful execution. The second cell, labeled '[5]', is titled 'Step 2: Connect to Google Drive' and contains code for mounting Google Drive. A modal dialog box is overlaid on the notebook, asking 'Permit this notebook to access your Google Drive files?'. The dialog explains that the notebook is requesting access to Google Drive files and that granting access will allow the notebook to modify files in the user's Google Drive. It includes a warning to review the code before allowing access. At the bottom of the dialog are two buttons: 'No thanks' and 'Connect to Google Drive'. The notebook code in the second cell includes comments and a line to change the output directory: `OUTPUT_DIR = '/content/drive/mydrive/quiz_outputs'`. It also includes a print statement for connection status and a `drive.mount()` call. The bottom status bar shows 'Executing (7s)' and 'Python 3'.

```
[4] ✓ 7s
!pip install pandas openpyxl --quiet
print('Dependencies ready')

✓ Dependencies ready

Step 2: Connect to Google Drive

This step will connect your notebook to your Google Drive. Once connected, you can save files to your Google Drive automatically.
You can specify the folder name in the code below. For example, you can save files to a folder named 'quiz_outputs' with any folder name you like.

This notebook is requesting access to your Google Drive files. Granting access to Google Drive will permit code executed in the notebook to modify files in your Google Drive. Make sure to review notebook code prior to allowing this access.

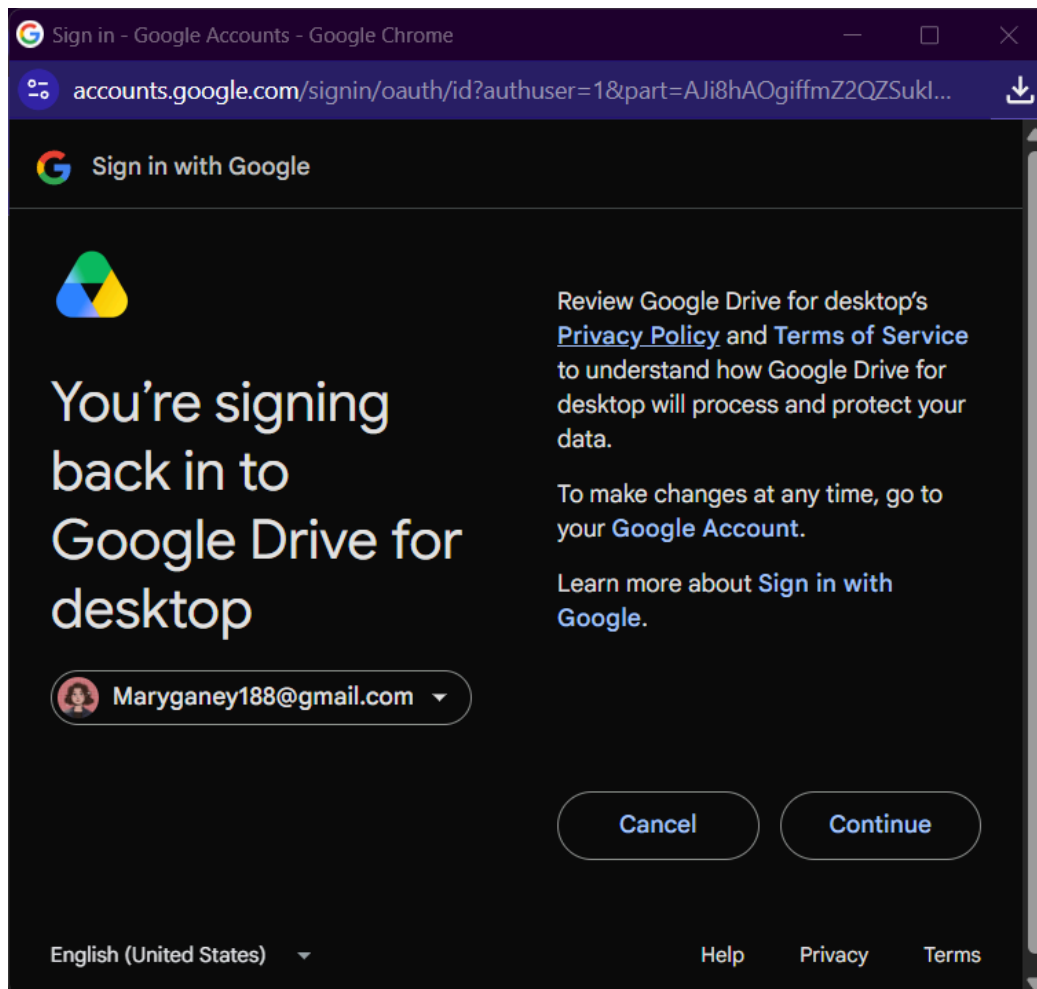

The following code will connect your notebook to your Google Drive.

[5] f
import os

# ---
# CHANGE THIS LINE to set where your output files will be saved in Google Drive
OUTPUT_DIR = '/content/drive/mydrive/quiz_outputs'
# ---

print('🔗 connecting to Google Drive...')
print('📄 A pop-up will ask you to sign in and grant permission - click Allow.')
drive.mount('/content/drive')

os.makedirs(OUTPUT_DIR, exist_ok=True)
print(f'📁 Google Drive connected!')
```

Step 2: Install dependencies

1. Find the cell labeled Step 2: Install Dependencies.
2. Click the play button (▶).
3. Wait for it to finish. You will see Done when it is complete.
4. This step sets up the tools the converter needs. It only takes about 30 seconds.

Step 3: Upload your .imsc file

1. Find the cell labeled Step 3: Upload Your .imsc File.
2. Click the play button (▶).
3. A Browse button will appear, click it.
4. Navigate to your Downloads folder and select the .imsc file from Schoology.
5. Click Open. The file will upload automatically.
6. Wait until you see the message: Loaded: your-quiz-name.imsc

Step 4: Run the conversion

1. Find the cell labeled Step 4: Extract and Parse Questions.
2. Click the play button (▶).
3. The tool will read your quiz and extract all questions. This usually takes 10–20 seconds.
4. When finished, you will see a table showing all the questions it found.
5. Check the table to make sure your questions look correct.

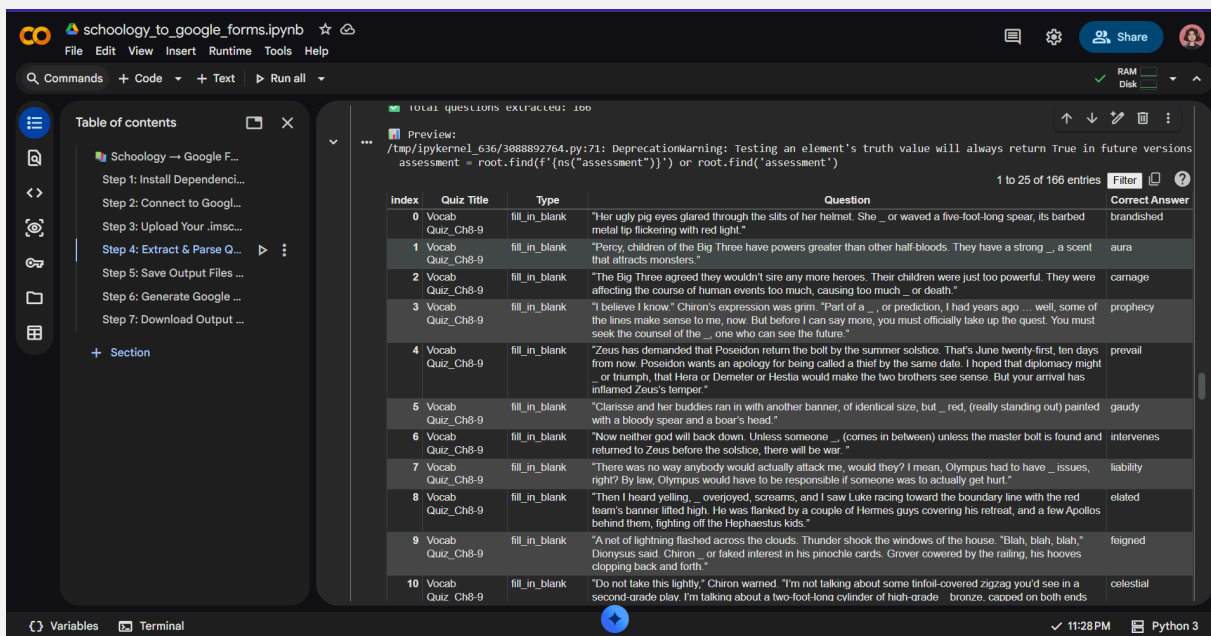

Table of contents

1 to 25 of 166 entries

index	Quiz Title	Type	Question	Correct Answer
0	Vocab Quiz_Ch8-9	fill_in_blank	"Her ugly pig eyes glared through the slits of her helmet. She _ or waved a five-foot-long spear, its barbed metal tip flickering with red light."	brandished
1	Vocab Quiz_Ch8-9	fill_in_blank	"Percy, children of the Big Three have powers greater than other half-bloods. They have a strong _ a scent that attracts monsters."	aura
2	Vocab Quiz_Ch8-9	fill_in_blank	"The Big Three agreed they wouldn't sire any more heroes. Their children were just too powerful. They were affecting the course of human events too much, causing too much _ or death."	carriage
3	Vocab Quiz_Ch8-9	fill_in_blank	"I believe I know." Chiron's expression was grim. "Part of a _ , or prediction, I had years ago ... well, some of the lines make sense to me, now. But before I can say more, you must officially take up the quest. You must seek the counsel of the _ one who can see the future."	prophecy
4	Vocab Quiz_Ch8-9	fill_in_blank	"Zeus has demanded that Poseidon return the bolt by the summer solstice. That's June twenty-first, ten days from now. Poseidon wants an apology for being called a thief by the same date. I hoped that diplomacy might _ or triumph, that Hera or Demeter or Hestia would make the two brothers see sense. But your arrival has inflamed Zeus's temper."	prevail
5	Vocab Quiz_Ch8-9	fill_in_blank	"Clarisse and her buddies ran in with another banner, of identical size, but _ red, (really standing out) painted with a bloody spear and a boar's head."	gaudy
6	Vocab Quiz_Ch8-9	fill_in_blank	"Now neither god will back down. Unless someone _ (comes in between) unless the master bolt is found and returned to Zeus before the solstice, there will be war."	intervenes
7	Vocab Quiz_Ch8-9	fill_in_blank	"There was no way anybody would actually attack me, would they? I mean, Olympus had to have _ issues, right? By law, Olympus would have to be responsible if someone was to actually get hurt."	liability
8	Vocab Quiz_Ch8-9	fill_in_blank	"Then I heard yelling, _ overjoyed, screams, and I saw Luke racing toward the boundary line with the red team's banner lifted high. He was flanked by a couple of Hermes guys covering his retreat, and a few Apollos behind them, fighting off the Hephaestus kids."	elated
9	Vocab Quiz_Ch8-9	fill_in_blank	"A net of lightning flashed across the clouds. Thunder shook the windows of the house. "Blah, blah, blah," Dionysus said. Chiron _ or faked interest in his pinocchio cards. Grover cowered by the railing, his hooves clapping back and forth."	feigned
10	Vocab Quiz_Ch8-9	fill_in_blank	"Do not take this lightly," Chiron warned. "I'm not talking about some tinfoil-covered zigzag you'd see in a second-grade play. I'm talking about a two-foot-long cylinder of high-grade _ bronze, capped on both ends"	celestial

TIP

If the table shows 0 questions, double-check that you exported the right file from Schoology and that it ends in .imsc, not .zip or .pdf.

Step 5: Generate the Google Form script

1. Find the cell labeled Step 5: Generate Apps Script.
2. Click the play button (▶).
3. This creates a small script file that will build your Google Form quiz automatically.
4. Your output files (including the script) will be saved to your Google Drive folder automatically.

Step 6: Download your output files

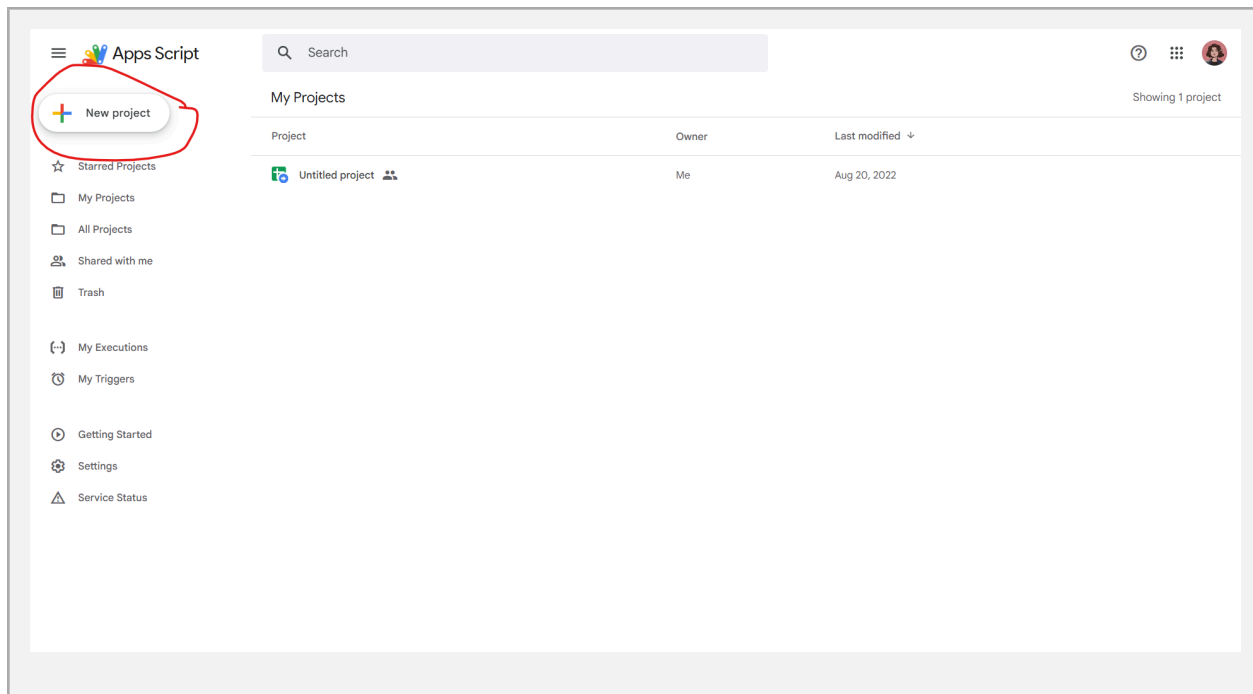

1. Find the cell labeled Step 6: Download Output Files.
2. Click the play button (▶).
3. Three files will download to your computer:
4. quiz_output.xlsx : a spreadsheet of all questions (good for reviewing)
5. quiz_output.csv : a plain-text version of the same data
6. create_google_forms.gs : the script that creates your Google Form

Part 4: Create Your Google Form Quiz

Now you will use the generated script to automatically build your Google Form quiz.

Step 1: Open Google Apps Script

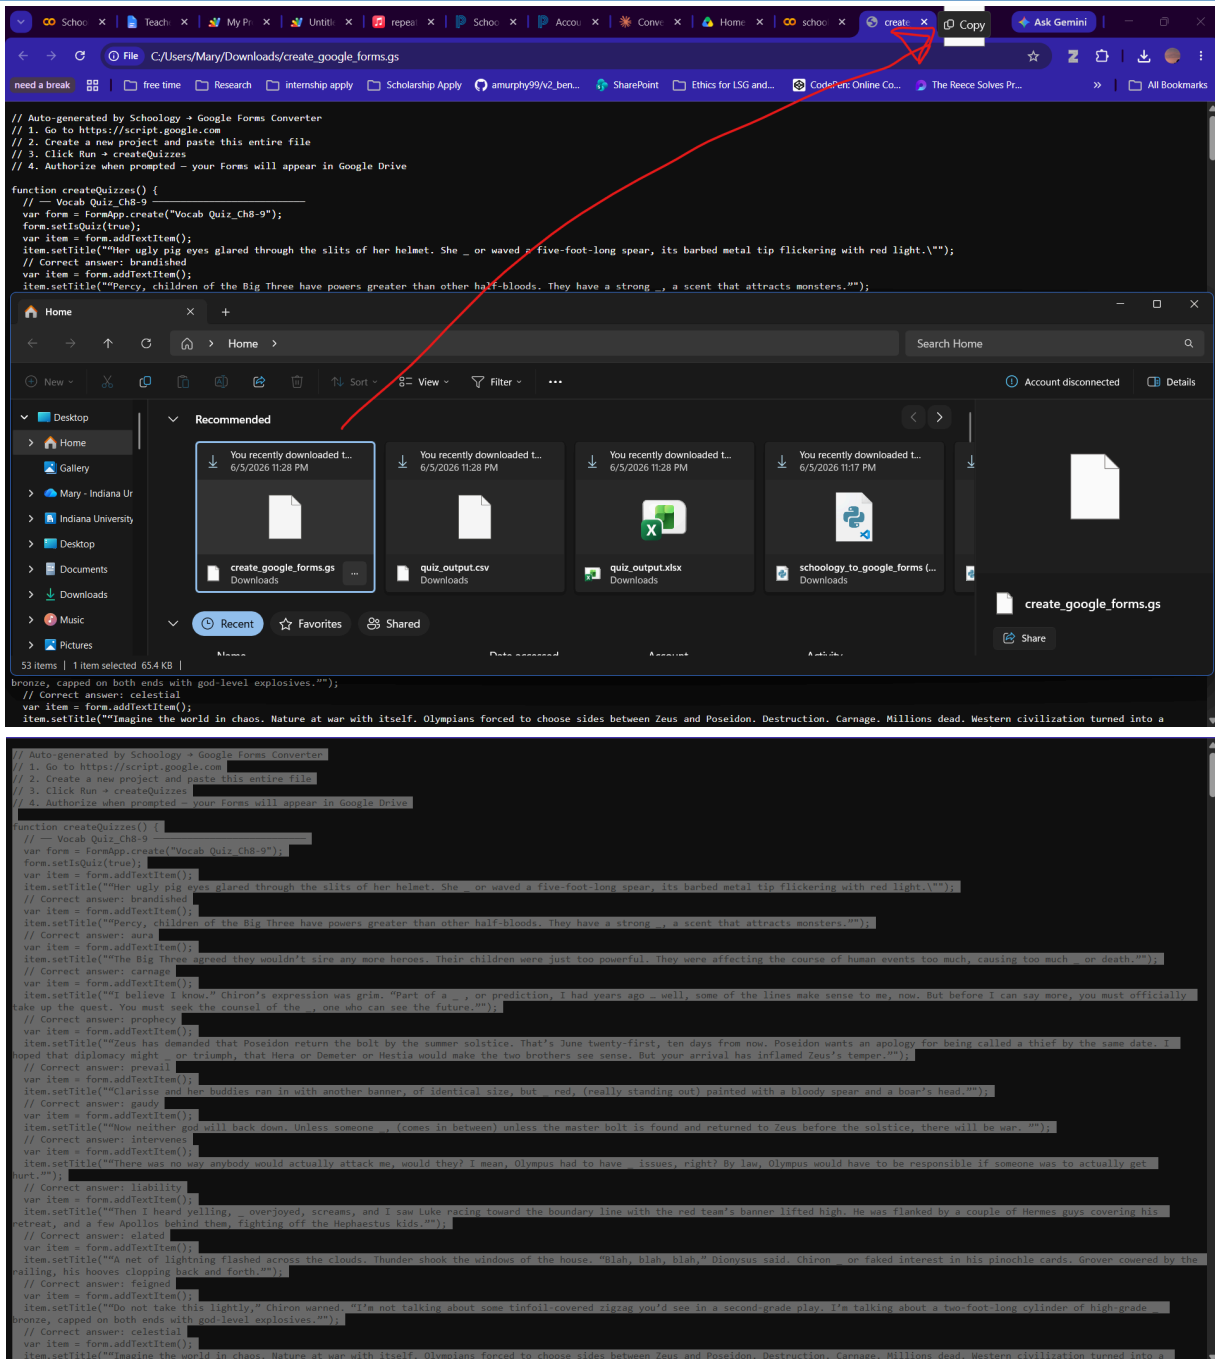

1. Go to <https://script.google.com> in your browser.
2. Sign in with your Google account if prompted.
3. Click the New project button (top left).

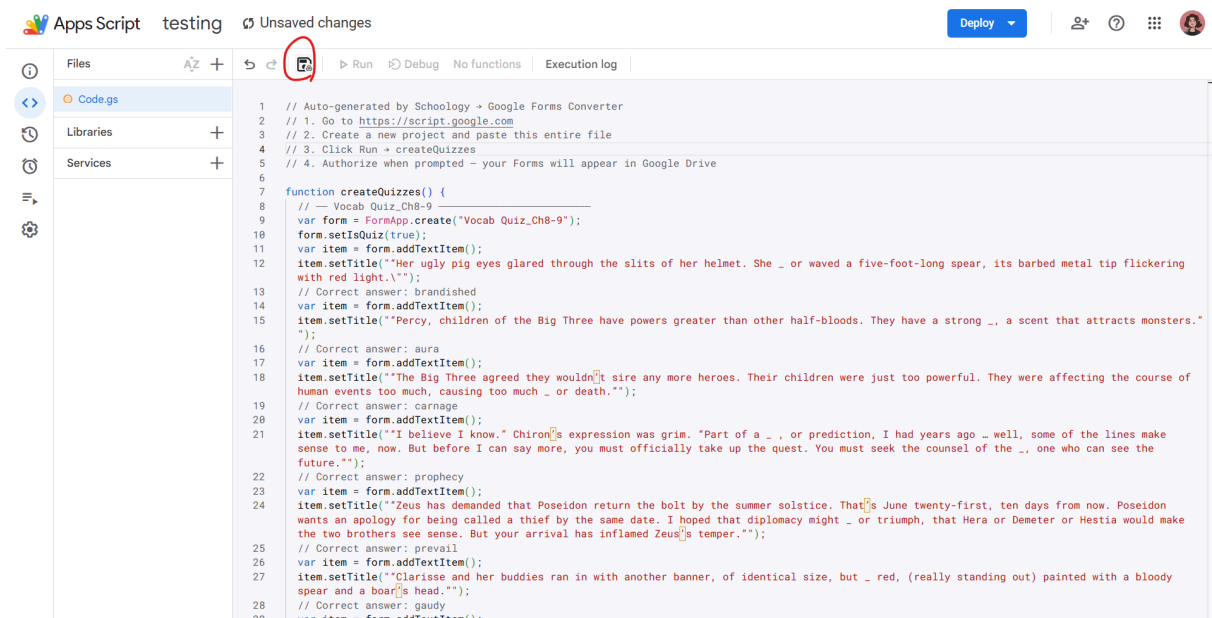

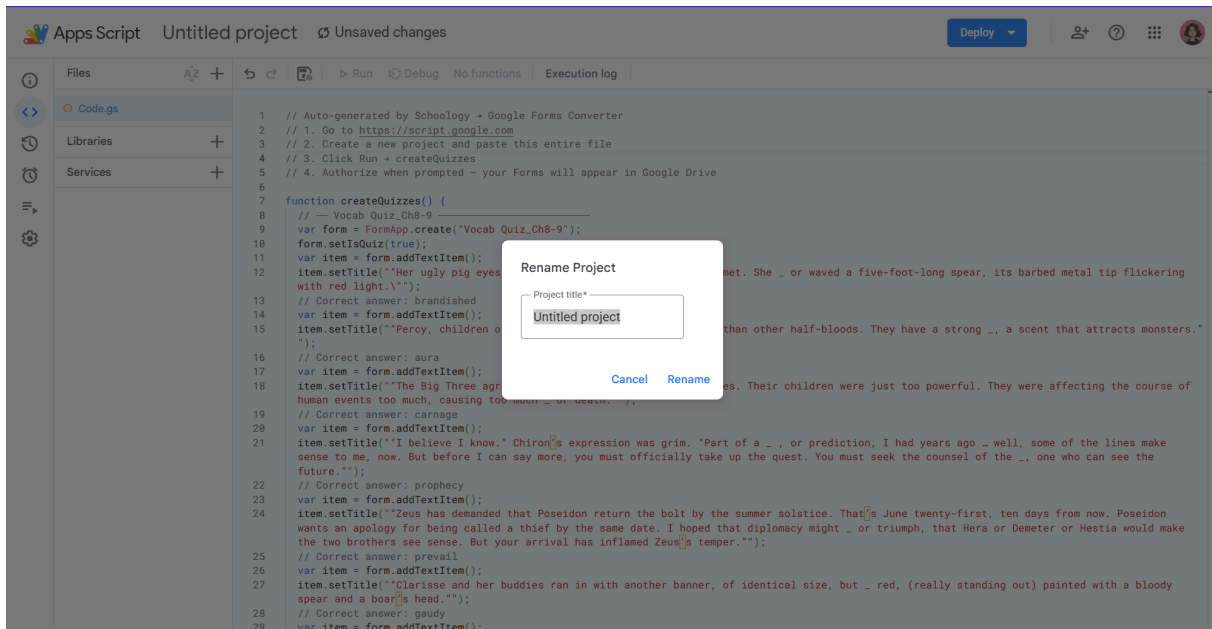

Step 2: Paste in the script

1. In the new project, you will see an empty code editor.
2. Open the file named create_google_forms.gs that you downloaded in Part 3, Step 6.

3. Drag the downloaded file to your chrome tab.
4. Back in the Apps Script editor, select all the existing text and delete it.
5. Paste in the copied script.
6. Save the file with a name (can always hit control+s or the save-to-drive button if you are unsure if the file saved).

Step 3: Run the script

1. At the top of the editor, make sure the dropdown next to the Run button says createQuizzes.
2. Click the Run button (▶).
3. A pop-up will ask you to review permissions. Click Review Permissions.
4. Choose your Google account and click Allow.
5. The script will run. When finished, you will see Execution completed at the bottom.

The top screenshot shows the Google Apps Script editor interface. The 'Run' button and the 'createQuizzes' dropdown menu are circled in red. The code in the editor is as follows:

```
1 // Auto-generated by Schoology - Google Forms Converter
2 // 1. Go to https://script.google.com
3 // 2. Create a new project and paste this entire file
4 // 3. Click Run - createQuizzes
5 // 4. Authorize when prompted - your Forms will appear in Google Drive
6
7 function createQuizzes() {
8   // -- Vocab Quiz_Ch8-9
9   var form = FormApp.create("Vocab Quiz_Ch8-9");
10  form.setIsQuiz(true);
11  var item = form.addTextItem();
12  item.setTitle("Her ugly pig eyes glared through the slits of her helmet. She _ or waved a five-foot-long spear, its barbed metal tip flickering with red light.");
13  // Correct answer: brandished
14  var item = form.addTextItem();
15  item.setTitle("Percy, children of the Big Three have powers greater than other half-bloods. They have a strong _, a scent that attracts monsters.");
16  // Correct answer: aura
17  var item = form.addTextItem();
18  item.setTitle("The Big Three agreed they wouldn't sire any more heroes. Their children were just too powerful. They were affecting the course of human events too much, causing too much _ or death.");
19  // Correct answer: carnage
20  var item = form.addTextItem();
21  item.setTitle("I believe I know." Chiron's expression was grim. "Part of a _, or prediction, I had years ago _ well, some of the lines make sense to me, now. But before I can say more, you must officially take up the quest. You must seek the counsel of the _, one who can see the future.");
22  // Correct answer: prophecy
23  var item = form.addTextItem();
24  item.setTitle("Zeus has demanded that Poseidon return the bolt by the summer solstice. That's June twenty-first, ten days from now. Poseidon wants an apology for being called a thief by the same date. I hoped that diplomacy might _ or triumph, that Hera or Demeter or Hestia would make the two brothers see sense. But your arrival has inflamed Zeus's temper.");
25  // Correct answer: prevail
26  var item = form.addTextItem();
27  item.setTitle("Clarisse and her buddies ran in with another banner, of identical size, but _ red, (really standing out) painted with a bloody spear and a boar's head.");
28  // Correct answer: gaudy
29  var item = form.addTextItem();
```

The bottom screenshot shows the same interface with an 'Authorization required' dialog box in the center. The dialog box contains the text: 'This app might not work as expected without providing all requested permissions.' and two buttons: 'Cancel' and 'Review permissions'.

Step 4: Find your new Google Form

1. Open Google Drive (drive.google.com).
2. Your new quiz form will appear in the main My Drive section.
3. Open it, and you should see all your questions already filled in.
4. You can now assign it in Google Classroom just like any other Google Form.

 **NOTE**
Your questions are imported but you may want to review the point values and grading settings in Google Forms before assigning the quiz to students. Open the quiz, go to the Responses tab, and click the Settings gear icon to configure grading.

The Google Form looks incomplete or has missing questions

Open the quiz_output.xlsx file that was downloaded. If the questions are all there in the spreadsheet, the issue is with the Apps Script step. Feel free to send me the file and share the .xlsx file so they can check the data.

I accidentally closed the tab

No problem. Go to drive.google.com, open the Colab Notebooks folder, and re-open your copy of the notebook. All your settings and output files are saved in your Drive.

TIP

If you reach out, it helps to include a screenshot of any error message you see, or attach the quiz_output.xlsx file so we can investigate quickly.

Quick Reference Checklist

Use this as a reminder each time you convert a quiz:

☐	Download quiz from Schoology as .imsc
☐	Open your personal Colab copy (not the shared link)
☐	Run Step 1: Connect to Google Drive
☐	Run Step 2: Install Dependencies
☐	Run Step 3: Upload the .imsc file
☐	Run Step 4: Convert and preview questions
☐	Run Step 5: Generate Apps Script
☐	Run Step 6: Download output files
☐	Paste script into script.google.com and run createQuizzes
☐	Find your new Google Form in Google Drive
☐	Review point values and grading settings in the Form
☐	Assign quiz in Google Classroom

End of Guide
